Summary

As soon as Ethereum came to life, I jumped into the blockchain industry and contributed to several blockchain architecturing projects & DApps.

Here's my
GitHub : https://www.github.com/crazydevhero
Website : https://crazy-dev-hero.netlify.app/
Telegram: https://t.me/crazydevhero

Main technologies in my expertise :
☞ Blockchain creation: using Golang & C++
☞ Solidity | Rust, programming languages for writing smart contracts
☞ NFTs, (non-fungible tokens) auto-generation, minting site, marketplace. gas optimization
☞ Bridges, cross-platform DEX protocol
☞ Smart Contracts, programs with tracking of certain conditions and usages of cryptocurrency
☞ Tokens creation (ERC-20, ERC-721/721A/1155 NFT, BEP-20...)
☞ DApps, software consisting of frontend +distributed backend + web3 integration

Experience

Blockchain Developer

MetaRents

Apr 2022 - Present (2 months +)
- MR Protocol Development and smart contracts audits
- Building a rental marketplace DApp

Blockchain Developer

Upwork

Dec 2021 - Present (6 months +)
THANKS TO PANDEMIC, pH7 cancelled some of their private projects and many of us got fired.
Again worked on Upwork as a freelancer - hooking new projects from different area/time-zones.

Blockchain Developer

pH7 Technologies Inc.

Apr 2021 - Dec 2021 (9 months)
Worked as blockchain consultant, smart contract developer(EVM, Solana)

Senior Developer

Hidden Brains InfoTech Pvt. Ltd.

Jun 2019 - Mar 2020 (10 months)
- Management of software build, release and deployment process.

- Experience in developing websites and web applications and also good knowledge of Mac operating system.
- Well versed with scripting languages.
- Testing products to ensure that they work satisfactorily and also in controlled and real-life environments.
- Leading junior software developers.

Blockchain Expert

Privi

Jun 2016 - May 2019 (3 years)

- Audit the already created Defi smart contracts.
- Developed smart contracts for tranding ERC20 tokens.
- Developed one dex platform based on the Deri protocol(https://deri.finance).
- Integrated the Loan platform by using Compound protocol(https://compound.finance)
- Developed nft marketplace(smart contract | Web3 | centralized backend) involving sale | blocking | rental features.
- Attended to the Realm Metaverse project as a web3 engineer.

Education

Cornell University

Bachelor's degree, Computer Science

Sep 2013 - May 2016

Ithaca, NY 14850

Skills

Blockchain • Smart Contracts • Solidity • Decentralized Applications (DApps) • Non-Fungible Tokens (NFTs) • Cryptocurrency • Metaverse • ethers.js • web3.js • Hardhat
